JOINT MEETING OF

THE AMERICAN SOCIETY OF NATURALISTS

THE SOCIETY OF SYSTEMATIC BIOLOGISTS

THE SOCIETY FOR THE STUDY OF EVOLUTION

AT

THE UNIVERSITY OF CALIFORNIA, BERKELEY

CLARK-KERR CAMPUS

JUNE 17-21, 1992

MEETING ORGANIZER: MONTGOMERY SLATKIN

MEETING PROGRAM

SUMMARY SCHEDULE OF EVENTS

WEDNESDAY, JUNE 17

SSB Council Meeting	3:00- 6:00 p.m.	Building 1, Room D1
SSE Council Meeting	3:00- 6:00 p.m.	Building 10 Executive Dining Room
Registration	5:00- 9:00 p.m.	Building 1
Opening Reception	7:00-10:00 p.m.	Building 10, Great Hall

THURSDAY, JUNE 18

Breakfast	7:00- 8:30 a.m.	Dining Center	
Registration	8:00a.m6:00p.m.	Building 14	
Contributed Papers	8:00-12:15 p.m.	See Schedule	
SSB Symposium: "Phylogenia	es of Model Organism	s"	
	8:00-12:10 p.m.	Theater	
Lunch	11:45- 1:30 p.m.	Dining Center	
SSB Business Meeting	12:45- 1:30 p.m.	Building 1 Room D1	
ASN Board Meeting	12:00- 3:00 p.m.	Building 10 Executive Dining Room	
Contributed Papers	1:30- 5:45 p.m.	See Schedule	
ASN Young Investigators Syr	mposium		
	2:00- 5:00	Theater	
SSE Invited Papers: "Heritab	le Microorganisms of l	Insects"	
	1:55- 5:30 p.m.	Building 4, Lounge	
Dinner	6:00- 7:30 p.m.	Dining Center	
ASN Presidential Address	7:30- 8:30 p.m.	Theater	
Poster Session I	8:30-11:00 p.m.	Building 14, Rooms 203, 204	
(Liquid refreshment will be se	rved)		

FRIDAY, JUNE 19

Breakfast 7:00- 8:30 a.m. Dining Center 8:00a.m.-6:00p.m. Building 14 Registration 8:00-12:15 noon See Schedule Contributed Papers ASN Symposium: "Evolutionary Responses to Environmental Stress" 8:35-12:00 noon Theater 8:00-12:00 Building 14, Rooms 203-204 Posters from Session I on display 11:45- 1:30 p.m. Dining Center Lunch **ASN Business Meeting** 1:00- 1:30 p.m. Building 1, Room D1 Building 10 12:15- 1:30 p.m. SSE Council Meeting Executive Dining Room (If necessary)

SSE Symposium: "Evolution of Developmental Polymorphisms"

1:30- 5:15 p.m.

1:30- 5:45 p.m.

Theater

Thai Banquet and SSE Presidential Address (Ticket required)

Contributed Papers

7:00- 9:30 p.m.

Pauley Ballroom

See Schedule

Student Union

(Reserved shuttle bus will depart every 10 minutes between 6:30 and 7:00 p.m. from oval drive in front of Building 1)

SATURDAY, JUNE 20

Breakfast

7:00- 8:30 a.m.

Dining Center

Registration

8:00a.m.-6:00p.m.

Building 14

Contributed Papers

8:00-12:15 noon

See Schedule

SSE Symposium: "Evolution in the Fungi: Patterns and Processes"

8:00-12:00 noon

Theater

Lunch

11:45- 1:30 p.m.

Dining Center

SSE Business Meeting

12:45- 1:15 p.m.

Building 10

Executive Dining Room

Contributed Papers

1:30- 5:45 p.m.

See Schedule

SSE Symposium: "Coalescent Theory and Its Application to Population Genetics and Phylogenetics"

1:30- 5:00 p.m.

Theater

Dinner

6:00- 7:30 p.m.

Dining Center

SSB Presidential Address

7:30- 8:30 p.m.

Theater

Poster Session II

8:30-11:00 p.m.

Building 14, Rooms 203-204

(Liquid refreshment will be served)

SUNDAY, JUNE 21

Breakfast

7:00- 8:30 a.m.

Dining Center

Contributed Papers

8:00-12:15

See Schedule

SSE Symposium: "Molecular Evolution of Development and Gene Expression"

8-30-12:00

Theater

Posters from Session II

8:00-12:00

Building 14, Rooms 203-204

on display

Check out of dormitory by 1:00 p.m.

NOTE:

The sessions will BREAK each day from 10:00-10:30 a.m. and 3:00-3:30 p.m. Coffee, tea and other refreshments will be served on the patio.

The book display will be in Building 14, Room 102 and open throughout the meeting.

NOTICE TO SPEAKERS AND POSTER PRESENTERS

<u>Speakers</u>: Please check the schedule to find the time and place of your talk. There may have been minor changes. Please note especially that the time allotted to you <u>includes</u> the question period, and help our Session Chairs keep the program on schedule.

<u>Poster Presenters</u>: In the program below, each poster has been assigned a number corresponding to a reserved space in Room 203-204 of Building 14. Information on the location of each space, and further details on set up, will be provided at registration. Poster Session I will take place on Thursday evening, 8:30-11:00 p.m. Session I posters may be left on display Friday morning, but must be removed at the lunch hour. Poster Session II will take place on Saturday evening, 8:30-11:00 p.m.; these posters may remain on display to the end of the meeting.

Poster set up times, when supplies and help from the organizers will be available, are as follows:

Session I: Thursday, June 18, 4:00-6:00 p.m. (The room will remain open until the session.)

Session II: Saturday, June 20, 4:00-6:00 p.m. (The room will remain open until the session.)

Contributed Paper Session Chairs: Please read the reminder at the end of the program.

SUMMARY SCHEDULE OF CONTRIBUTED PAPER SESSIONS

Time	Building 3	Building 4	Building 7	Building 8	Theater
Th. a.m. l	Genetic Population Structure	Behavior & Evolution	Hybrid Zones & Speciation	Plants: Mating Systems &	SSB Symposium Phylogenies of Model

NOTE ON PROGRAM DESIGN: Similar biology topics were grouped in an attempt to form coherent sequences of topics. Subject to scheduling constraints, every attempt was made to place speakers in their first choice sessions. Categories are necessarily coarse and overlapping; read the whole program to find all papers on a given subject.

SCIENTIFIC PROGRAM (Chronological Order)

THURSDAY	MORNING THEATER
	SSB SYMPOSIUM: PHYLOGENIES OF MODEL ORGANISMS MODERATOR: E.A. KELLOGG
8:00	E.A. KELLOGG; J.A. BIRCHLER. Arnold Arboretum, Harvard University. Zea.
8:25	I. Al-SHEHBAZ. Missouri Botanical Garden; R.A. PRICE. Indiana University. Arabidopsis.
8:50	R. DESALLE; D. GRIMALDI. American Museum of Natural History. Drosophila.
9:15 9:40	W.K. THOMAS. University of California at Berkeley. Caenorhabditis. D.E. DYKHUIZEN. State University of New York at Stony Brook.
10:05	Escherichia. BREAK
10:05	B. BOWMAN; M. BIRBEE; J. TAYLOR; T. WHITE. University of
	California at Berkeley. Yeast, Neurospora, and Aspergillus.
10:55	R.D. SAGE. University of Missouri; W.R. ATCHLEY. North Carolina State University. <i>Mus</i> .
11:20	D.C. CANNATELLA. University of Texas. Xenopus.
11:45	H.B. SHAFFER. University of California at Davis. Ambystoma.

9:45 10:00	CHU, PO HSINGDePaul University. Using evolutionary models to find optima in difficult combinatorial problems: effect of population structure in a genetic algorithm. BREAK
THURSDAY	MORNING I LOUNGE, Building 4
	Contributed papers 2: BEHAVIOR AND EVOLUTION
	CHAIR: DEBORAH M. GORDON
8:00	QUELLER, DAVIDRice University. A simple and general formulation
	of inclusive fitness theory.
8:15	RICHARDS, MIRIAM; JOHN TAYLOR; LAURENCE PACKERYork
	University. The evolution of social behaviour in sweat bees of the
	genus Halictus (Hymenoptera: Halictidae).
8:30	CRESPI, BERNARD JSimon Fraser University. Altruism under
	haplodiploidy: the social behavior of a female-dimorphic Australian gall
	thrips (Insecta: Thysanoptera).
8:45	LYNCH, ALEJANDRORoyal Ontario Museum. Cultural diversity in
	song memes in peripherally isolated populations of chaffinches.
9:00	RUZZANTE, DANIEL E.; ROGER W. DOYLEDalhousie University.
	Rapid changes in agonistic and schooling behavior in Medaka (Oryzias
	latipes) during selection for competitive growth.
9:15	DYER, LEEUniversity of Colorado. The importance of predation and
	plant chemistry in the evolution of host specialization: selection
	pressure from the giant tropical ant, Paraponera clavata.
9:30	GORDON, DEBORAH MStanford University. Behavioral flexibility
0.00	and the foraging ecology of seed-eating ants.
9:45	SAUL, LEIFUniversity of California at Berkeley. A game-theory
• • • • • • • • • • • • • • • • • • • •	model of a wandering forager's response to potential competitors.
10:00	BREAK
THURSDAY	Y MORNING I LOUNGE, Building 7
	Contributed papers 3: HYBRID ZONES AND SPECIATION
	CHAIR: DAPHNE J. FAIRBAIRN
8:00	ARNOLD, MICHAEL LUniversity of Georgia. Interspecific pollen
0.00	competition and reproductive isolation in Louisiana irises.
8:15	CRUZAN, MITCHELL B.; M. L. ARNOLDUniversity of Georgia.
00	Ecological associations of cpDNA and RAPD markers in a hybrid Iris
	population.
8:30	YOUNG, NELSON DCornell University. Multiple markers in hybrid
0.00	zone analysis: Pacific Coast irises.
8:45	ORR, MATTHEWUniversity of California at Davis. Adaptation to
0.40	altitude in a grasshopper hybrid zone.
9:00	HARRISON, RICHARDCornell University. Use of nuclear RFLPs to
3.00	analyze pattern and process in a field cricket hybrid zone.
	analyze pattern and process in a new cheket hybrid zone.

9:15	GALLANT, S.; R. PREZIOSI; D. FAIRBAIRNConcordia University. Discovery of a restricted hybrid zone within a waterstrider species complex. Evidence of secondary intergradation?
9:30	PARSONS, THOMAS J.; MICHAEL J. BRAUNSmithsonian Institution. Unidirectional introgression of male secondary sexual plumage traits across an avian hybrid zone (genus Manacus).
9:45	HOSTERT, ELLEN E.; WILLIAM R. RICEUniversity of California at Santa Cruz. Parapatry, geography, and speciation.
10:00	BREAK
_	DAY MORNING I LOUNGE, Building 8
С	ontributed papers 4: PLANTS: MATING SYSTEMS AND INBREEDING
8:00	CHAIR: KEITH KAROLY
8:00	KAROLY, KEITHState University of New York at Stony Brook.
	Inbreeding depression and the mating system: within population variation in the annual Lupinus nanus (Leguminosae).
8:15	CARR, DAVID E.; MICHELE R. DUDASHUniversity of Maryland at
	College Park. Components of inbreeding depression in Mimulus
	guttatus: from germination through pollen and ovule production.
8:30	LATTA, ROBERT G University of Toronto. Inbreeding depression in
	Mimulus spp. in relation to levels of prior inbreeding.
8:45	DOLE, JEFFEREY; KERMIT RITLANDUniversity of Montana,
	Inbreeding depression in two Mimulus taxa measured by
0.00	multigenerational changes in the inbreeding coefficient.
9:00	DELPH, LYNDA F.; SANDRA L. DAVISIndiana University. Mixed
9:15	mating and inbreeding depression in a gynomonoecious plant.
3.13	ECKERT, CHRISTOPHER G.; SPENCER C.H. BARRETTUniversity of
	Toronto. Mating systems and inbreeding depression in tristylous Decodon verticillatus (Lythraceae).
9:30	KARKKAINEN, KATRI ANNELI; O. SAVOLAINENUniversity of Oulu,
0.00	Finland. Early inbreeding depression determines the mating system
	variation in scots pine.
9:45	MAYER, STEPHANIE S.; DEBORAH CHARLESWORTHUniversity of
	Chicago. A study of inbreeding depression in four populations of the
	annual plant Colliasia heterophylla.
10:00	BREAK
THURSD	AY MORNING II LOUNGE, Building.3
	Contributed papers 5: GENETIC POPULATION STRUCTURE
10:30	CHAIR: ROBERT WISOTZKEY
10.30	CAMPBELL, R.BUniversity of Northern Iowa. Inbreeding and the
10:45	number of alleles at equilibrium with mutation. WHITI OCK MICHAEL I Iniversity of Chicago. The maintenance of
, 0, 40	WHITLOCK, MICHAELUniversity of Chicago. The maintenance of additive genetic variation in a two-locus island model.
	addition gonetic variation in a two-locus island illodel.

11:00	KOENIG, WALTHastings Natural History Reservation, University of California. <i>Philopatry, detectability, and the distribution of dispersal</i>
	distances.
11:15	EPPERSON, BRYAN K University of California at Riverside. Patterns
11:30	of gene flow and genetic isolation by distance. WISOTZKEY, ROBERTUniversity of Hawaii. The distribution of two
44.4	dispersed middle repetitive elements in the Hawaiian Drosophila.
11:45 ·	GERBER, ANNE S Washington University. <i>Population subdivision in Trimerotropis saxatilis (Acrididae).</i>
12:00	DUFFY, J. EMMETTUniversity of North Carolina. Host use patterns
	and population structure in tropical sponge-dwelling shrimps:
	implications for speciation mechanisms.
T	/ MODAWAGE D. W. C.
THURSDAY	/ MORNING II LOUNGE, Building 4
	Contributed papers 6: LIFE HISTORY EVOLUTION: THEORY CHAIR: STEVEN ORZACK
10:30	FRUMHOFF, PETER CUniversity of Maryland; WILLIAM H.
	BOSSERTHarvard University. Maternal investment in seasonal
	environments: the adaptive value of complex strategies.
10:45	ORZACK, STEVENUniversity of Chicago; ELLIOTT SOBERUniversity
	of Wisconsin. ESS models and the long-run test of adaptationism.
11:00	VASI, FARIDAMichigan State University. Evolution of life history
44.45	characters in a periodic environment.
11:15	FOX, GORDON AUniversity of Arizona. Can demographic stochasticity bias life history evaluation?
11:30	WIENER, PAMStanford University. Migration in variable
11.50	environments: exploring life history evolution using structured
	population models.
11:45	VASCO, DANIEL AUniversity of Texas at Austin. On the principle
	of evolutionary stability in evolutionary biology.
THURSDAY	Y MORNING II LOUNGE, Building 7
	Contributed papers 7: HYBRID ZONES AND SPECIATION
	CHAIR: WILLIAM J. ETGES
10:30	WELLS, MARTA MARTINEZUniversity of Connecticut. Behavioral
	responses of hybrid lacewings (Neuroptera: Chrysopidae: Chrysoperla)
10.15	to courtship songs.
10;45	SHAW, KERRY LWashington University. The quantitative genetics
	of interspecific song differences between two species of Hawaiian
11:00	CRECORY RAMELA G : DANIEL I HOWARD Now Maying State
11:00	GREGORY, PAMELA G.; DANIEL J. HOWARDNew Mexico State University. Multiple mating and sperm competition in the ground
	crickets Allonemobius fasciatus and A. socius.
	CHORECS ANOTHERIODIUS TUSCIALUS AND M. SUCIUS.

11:15 ETGES, WILLIAM J.--University of Arkansas. Causes for premating isolation among populations of cactophilic Drosophila mojavensis. 11:30 STOLTENBERG, SCOTT F.; JERRY HIRSCH--University of Illinois. A long term (35 + years) divergent (intermittent) selection experiment on a behavioral trait in Drosophila melanogaster has produced evolved populations that may prove useful for the study of speciation. 11:45 FEDER, JEFFREY; CATHY REYNOLDS; WES GO--University of Chicago. The ecology of host race formation in Rhagoletis pomonella: differential resource competition for larvae infesting apples and hawthorns. 12:00 SPISAK, STEVEN--California State University; JEFFREY FEDER--University of Chicago; SUSAN OPP; KATHY REYNOLDS--California State University. Host fidelity in Rhagoletis pominella as indicated by mark recapture technique. THURSDAY MORNING II LOUNGE, Building 8 Contributed papers 8: PLANTS: MATING SYSTEMS AND INBREEDING CHAIR: LISA P. RIGNEY 10:30 WALLER, DONALD M .-- University of Wisconsin. Does a history of inbreeding decrease inbreeding depression? 10:45 HOLSINGER, KENT E .-- University of Connecticut. Mass-action models of plant mating systems--the role of inbreeding depression. 11:00 RIGNEY, LISA P.--State University of New York at Stony Brook. Inbreeding depression in Erythronium grandiflorum: six years of data on a long-lived perennial. 11:15 BARRETT, SPENCER C.H.--University of Toronto. Patterns of style length variation in Narcissus (Amaryllidaceae) and the evolution of heterostyly. 11:30 MCCALL, CLAIRE--Trinity University. Heterostyly and its relationship to offspring fitness in hoary puccoon (Lithospermum croceum). STONE, JUDY L.; JAMES D. THOMSON--State University of New 11:45 York at Stony Brook. The evolution of distyly: pollen transfer by bees between artificial flowers. 12:00 CRUZAN, MITCHELL B .-- University of Georgia; S.C.H. BARRETT--University of Toronto. Ecological and physiological determinants of the mating system in Eichhornia panicalata. THURSDAY AFTERNOON THEATER ASN YOUNG INVESTIGATORS SYMPOSIUM

ORGANIZER: J. TRAVIS, Florida State University

2:00 AVILES, LETICIA. Harvard University. Levels of selection and sex ratio evolution in social spiders.

2:30 BRODIE III, EDMUND D. University of California at Berkeley. Correlational selection and genetic integration in natural populations of snakes. 3:00 BREAK 3:30 FAJER, ERIC D. Harvard University. Effects of CO2 enrichment on plant-herbivore interactions. 4:00ORR, H. ALLEN. University of California at Davis. The genetics of speciation in Drosophila. 4:30 WOOTTON, J. TIMOTHY. University of California at Berkeley. Using path analysis to predict the importance of direct and indirect interactions in food webs. THURSDAY AFTERNOON LOUNGE, Building 4 SSE INVITED PAPERS: HERITABLE MICROORGANISMS OF INSECTS ORGANIZER: J. WERREN 1:55 Introduction: J. Werren 2:00 S. O'NEILL. Yale University. Phylogeny and mechanisms of action of cytoplasmic incompatibility microorganisms. 2:30 A. HOFFMAN. La Trobe University, Australia. Population biology of cytoplasmic incompatibility microbes in Drosophila. 3:00 BREAK 3:30 B. CAMPBELL. United States Department of Agriculture, Albany, California. Heritable symbionts in herbivorous insects. 4:00 S. SKINNER. Indiana University. Sex ratio distorting microorganisms of Nasonia. 4:30 J. BREENWER. University of Rochester. Microbes associated with parthenogenesis and incompatibility in Hymenoptera. 5:00 J. WERREN. University of Rochester. Heritable microorganisms-- what a way to make a living. THURSDAY AFTERNOON I LOUNGE, Building 3 Contributed papers 9: GENETIC POPULATION STRUCTURE CHAIR: GEORGE I. MATSUMOTO 1:30 FUGATE, MICHAEL--University of California at Riverside. Relationship of populations within four species of fairy shrimp. 1:45 BOULDING, ELIZABETH; J. BOOM, A.T. BECKENBACH--Simon Fraser University. Genetic variation in one bottlenecked and two wild populations of scallops; parameter estimates from coding and noncoding regions of mtDNA. 2:00 KATOH, MASAYA; DAVID W. FOLTZ--Louisiana State University. Large genetic and morphological variation among and within drainage systems in a freshwater snail species complex.

2:15 HELLBERG, MICHAEL E.--University of California at Davis. Limited dispersal and broad geographic range: patterns of gene flow in the solitary coral Balanophyllia elegans. 2:30 MATSUMOTO, GEORGE I .-- Monterey Bay Aquarium Research Institute. Genetic identification and characterization of siphonophores and ctenophores. 2:45 CASWELL-CHEN, E.P.; V.M. WILLIAMSON; F. F. WU--University of California at Davis. Random amplified polymorphic DNA analysis of Heterodera cruciferae (Nematoda) and H. schachtii populations. 3:00 BREAK THURSDAY AFTERNOON I LOUNGE, Building 7 Contributed papers 10: HYBRID ZONES AND SPECIATION CHAIR: MARGARET B. PTACEK 1:30 MEFFERT, LISA M .-- University of Houston. Escape from inbreeding depression and apparent evolutionary constraints in non-reproductive behavior of serially bottlenecked lines of the housefly. LEVY, FROSTY--East Tennessee State University. Localization of 1:45 factors causing hybrid sterility in Phacelia. 2:00 GROTH, JEFFREY G .-- American Museum of Natural History. Allozyme and mtDNA sequence comparisons of sympatric sibling species of crossbills (Loxia, Fringillidae). 2:15 PTACEK, MARGARET B.; H. CARL GERHARDT--Florida State University. Multiple origins of the tetraploid gray treefrog, Hyla versicolor: evidence from mitochondrial DNA and advertisement calls. 2:30 ANNETT, CYNTHIA A.; RAYMOND PIEROTTI--University of Arkansas. Male parental care, mate choice and hybridization in vertebrates: does monogamy counteract reproductive isolation? 2:45 YU, ALEX HON-TSEN--University of California at Berkeley. Patterns of diversification and gene flow of small mammals in the Southeast Asia. 3:00 BREAK THURSDAY AFTERNOON I LOUNGE, Building 8 Contributed papers 11: PLANTS: MATING SYSTEMS, REPRODUCTIVE BIOLOGY CHAIR: JOSHUA R. KOHN 1:30 KOHN, JOSHUA R .-- University of California at San Diego; SPENCER C.H. BARRETT--University of Toronto. Morph structure alters the reproductive success of a selfing variant in experimental populations of Eichhornia paniculata. 1:45 HARDER, LAWRENCE D.; SPENCER C.H. BARRETT--University of Calgary. Anther position influences on pollen removal from tristylous Pontederia cordata. 2:00 BERTIN, ROBERT--Holy Cross College. On the adaptive significance of dichogamy in angiosperms.

2:15	LITCHFIELD, LARA B.; ELIZABETH E. LYONSAmherst College. Correlations among sequential stages of reproduction in selfing and
2:30	outcrossing taxa of Leavenworthia. CHRISTIANSEN, CATHERINE; ELIZABETH E. LYONSAmherst College. Floral evolution and the evolution of selfing in the mustard
2:45	genus Leavenworthia. LYONS, ELIZABETH EAmherst College. The coevolution of floral traits and the evolution of selfing in the mustard genus
3:00	Leavenworthia. BREAK

THURSDAY AFTERNOON II LOUNGE, Building 8 Contributed papers 14: PLANTS: MATING SYSTEMS, REPRODUCTIVE BIOLOGY CHAIR: MARTIN MORGAN 3:30 RONSHEIM, MEG--Vassar College. A test of the elbow room model for the evolution of sex using sexual and asexual progeny of Allium vincale. COLEMAN, JERRY G .-- University of Texas at Austin. Quantitative 3:45 genetic analysis of life history traits in a clonal grass. 4:00 CARR, DAVID E.; CHARLES B. FENSTER--University of Maryland at College Park. Quantitative genetics of floral traits associated with mating-system evolution in Mimulus (Scrophulariaceae). 4:15 KARRON, JEFFREY D.--University of Wisconsin at Milwaukee. The influence of plant density on patterns of gene dispersal in Mimulus ringens. WILLIS, JOHN H .-- University of Oregon. Partial inbreeding biases 4:30 analyses of phenotypic selection: an example from Mimulus guttatus. 4:45 NAKAMURA, R.R.--California State University at Los Angeles; B. DEVLIN; M. STANTON--University of California at Davis; N. ELLSTRAND--University of California at Riverside. Floral traits and male reproductive success in a natural population of wild radish. 5:00 VEKEMANS, XAVIER--Universite Libre de Bruxelles, Belgium. Evolution of the breeding system in Armeria maritima: geographic

variation, sex allocation and population genetic structure.

MORGAN, MARTIN--University of Chicago. The selection of excess flower production in hermaphroditic plants.

THURSDAY EVENING

THEATER

ASN PRESIDENTIAL ADDRESS 7:30-8:30 p.m.
DR. PHILIP W. HEDRICK, Pennsylvania State University
"Evolutionary Genetics of the Major Histocompatibility Complex."

THURSDAY 8:30-11:00 PM

Building 14, ROOMS 203-204

The poster sessions will be accompanied by complimentary liquid refreshment derived from grain.

POSTER SESSION I

- KASPARI, MICHAEL--University of Texas at Austin. Microclimate partitioning in neotropical ants: body size phylogeny and species interactions.
- 2. BRAZEAU, DANIEL A.--University of Houston; C. DREW HARVELL--Cornell University. Genetic structure of local populations and speciation in the Caribbean gorgonian Briareum asbestinum (Pallas).
- 3. DA SILVA, KAREN BURKE--McGill University. The 'trill' of the chase: eastern chipmunks call to warn kin.
- 4. MARKOW, THERESE ANN--Arizona State University. Developmental stability and male mating success in three Drosophila species.
- 5. MCMURRY, KAY; BROOK G. MILLIGAN--University of Texas at Austin. A maximum likelihood method of fertility estimation suitable for codominant and dominant alleles: computer simulation of matings among hermaphroditic plants.
- 6. HAUSER, THURE PAVLO--Washington University at St. Louis. *Inbreeding depression and population structure in Lychnis flos-cuculi (Caryophyllaceae)*.
- 7. LE CORFF JOSIANE--University of Miami. Establishment of chasmogamous and cleistogamous seedlings in an ant-dispersed understory herb.
- 8. XU, SHI-ZHONG; WILLIAM M. MUIR--Rutgers University. *Inbreeding effective population size under selection.*
- 9. GAGGIOTTI, OSCAR E.--Rutgers University. An ecological model for the maintenance of sex and geographic parthenogenesis.
- 10. BASOLO, ALEXANDRA L.--University of California at Santa Barbara.

 Preliminary investigations of color pattern evolution in southern Platyfish.
- 11. IRSCHICK, DUNCAN; H. BRADLEY SHAFFER--University of California at Davis. Phylogenetic and ecological components of morphological variation in the tiger salamander (Ambystoma tigrinum).
- 12. **LINHART, YAN B.**--University of Colorado. *Multi-species herbivory maintains genetic polymorphism in Thymus vulgaris (Labiatae).*
- 13. **TWOMBLY, SARAN**--University of Rhode Island. *Intra-and interpopulational life cycle variation in a freshwater copepod.*

- 14. **DERRICKSON, ELISSA MILLER; NICHOLAS JERRARD**—Loyola College. Intraspecific and interspecific variation in milk composition in small altricial and precocial rodents.
- 15. PAVEK, DIANE; TOM MITCHELL-OLDS--University of Montana. Quantitative genetic variation for fitness components in natural populations of Fragaria virginiana.
- 16. **FELDMAN, ROBERT A.**--University of Hawaii. *A PCR-based diagnostic test for introduced avian malaria in Hawaiian honeycreepers.*
- 17. JEFFERY, DUANE E.--Brigham Young University; MONTE E. TURNER-University of Akron; JAMES L. FARMER--Brigham Young University.

 Genetic diversity of isolated populations of Drosophila pseudoobscura on the Colorado Plateau.
- 18. **COLLETT, JANET I.**--University of Sussex, United Kingdom. *Making sense of allelic variation: physiological and genetic differences among the three Dipeptidases of Drosophila pseudo-obscura.*
- 19. **BENNINGTON, CYNTHIA C.** West Virginia University. *Natural selection in artificial populations of Impatiens pallida: the importance of the invisible fraction.*
- 20. **LEAMY, LARRY**--University of North Carolina at Charlotte. *Effects of litter size on brain size and body size in inbred and hybrid house mice.*
- 21. **COFFROTH, MARY-ALICE**--State University of New York at Buffalo. *Can random amplified polymorphic DNA (RAPD) markers be used to assess paternity in a clonal gorgonian coral?*
- 22. FLEISCHER, ROBERT; CHERYL TARR--National Zoological Park. Genetic population structure in endangered Hawaiian birds.
- 23. **LEEBENS-MACK, JIM; BROOK MILLIGAN**—University of Texas at Austin. Indirect estimates of gene flow are not influenced by variation in population size.
- 24. RODERICK, GEORGE--University of Maryland at College Park. Population structure of Colorado potato beetles in native and managed habitats: migration rates estimated from gene frequencies and coalescence.
- 25. BALANYA, J.--Universidad de Barcelona, Spain. Colonizing populations of Drosophila subobscura: evolution of chromosomal clines in North America.
- 26. GIBBS, ALLEN--University of California at Davis; THERESE MARKOW--Arizona State University. *Inter and intraspecific variation in Drosophila cuticular lipids*.
- 27. SERRA, L.--Universidad de Barcelona, Spain. Analysis of quantitative traits in colonizing and palearctic populations of Drosophila subobscura.
- 28. BRAVERMAN, JOHN--University of California at Davis. Loss of paternal chromosome causes developmental anomalies among Drosophila hybrids.
- 29. MARLER, CATHERINE--University of Texas at Austin. Evolutionary change in species mating preferences in the unisexual gynogenetic hybrid, Poecilia formosa.

- 30. LOSOS, JONATHAN--University of California at Davis; KEN WARHEIT -National Museum of Natural History. Adaptation and founder effects: field
 experiments with Anolis lizards.
- 31. BARRIGA I.; K. BECKENBACH; M.J. SMITH; E.B. HARTWICK--Simon Fraser University. Molecular phylogenetic analysis of 5 west coast Octopus spp. using mtDNA.
- 32. COURTNEY, MARK W.--University of Southwestern Louisiana. Chloroplast DNA in duckweed (Lemnaceae): variation within and among species.
- 33. GARCIA, PASCALE--Universite de Montpellier II, France; M. EDGELL--University of North Carolina at Chapel Hill; F. BONHOMME--Universite de Montpellier II, France. Evolutionary impact of repetitive families: analysis of LINE-1 retroposons deletion rate in mice.
- 34. **GJETVAJ, BRANIMIR**--Queen's University. *Mitochondrial DNA sequences in the nuclear genomes of geese.*
- 35. KARJALAINEN, MATTI; PAIVI KARVONEN; OUTI SAVOLAINEN--University of Oulu, Finland. Variation of rDNA in Pinus sylvestris.
- 36. **LEHMAN, NILES.** Scripps Research Institute. *Directed evolution of ribozymes with new phenotypes.*
- 37. MARTIN, SANDRA L.--University of Colorado. Hibernation in mammals as a model system for the role of differential gene expression in adaptive evolution.
- 38. **SALAMON. HUGH**--University of California at Berkeley. *Evolution of antigen presenting molecules: disequilibrium between amino acid sites in the major histocompatibility complex.*
- 39. SIMMONS, GAIL M.--City College of New York. Molecular evolution of hobo transposable elements in Drosophila.
- 40. **TERRETT, JON--**The Natural History Museum, United Kingdom; **RICHARD H. THOMAS---**-University of Nottingham, United Kingdom. *The mitochondrial genome of Cepaea nemoralis*.
- 41. WU, CHUNG-I; DANIEL PEREZ; ANDREW DAVIS; NORMAN JOHNSON; ERIC CABOT; MICHAEL PALOPOLI; HOPE HOLLOCHER--University of Chicago.

 Molecular genetic studies of postmating reproductive isolation between Drosophila simulans and its two sibling species.
- 42. CHOUDHARY, MADHUSUDAN; DAVID QUELLER; JOAN STRASSMANN--Rice University. The phylogenetic relationships among social parasites and their hosts in polistine wasps.
- 43. POLANS, NEIL O.--Northern Illinois University. An evaluation of the use of RAPD markers in a cladistic analysis of Pisum.
- 44. **CULLINGS, KEN--**University of California at Berkeley. *Multiple origins of mycotrophic parasitism in the Ericaceae.*
- 45. GARCIA-PEREA, ROSA--Smithsonian Institution. *Phylogenetic relationships among recent representatives of genus Lynx (Carnivora: Felidae).*
- 46. **SWIDERSKI, DONALD L.--**University of Michigan. *Scapula size and shape changes in the evolution of chipmunks and ground squirrels.*

- 47. SLADE, ROBERT; A NITA HEIDEMAN; PETER HALE; CRAIG MORITZ--University of Queensland. Using PCR to detect nuclear gene variation across diverse species.
- 48. **PEACOCK, MARY**--Arizona State University. *Inbreeding in pikas (Ochotona princeps): philopatry and mating patterns, a correlation?*

EDID AV	NADVINA
FRIDAY	MORNING THEATER
	ASN VICE-PRESIDENTIAL SYMPOSIUM:
	EVOLUTIONARY RESPONSES TO ENVIRONMENTAL STRESS
	MODERATOR: P.A. PARSONS
8:30	P.A. PARSONS. Waite Institute, University of Adelaide, Australia. The
	importance and consequences of stress in natural populations: from
	life history variation to evolutionary change.
9:00	R.B. HUEY; J. KINGSOLVER. University of Washington. Evolutionary
	responses to extreme temperatures in ectotherms.
9:30	R.E. LENSKI. Michigan State University; A.F. BENNETT. University of
	California at Irvine. Evolutionary adaptation by Escherichia coli to
	changes in its thermal environment.
10:00	BREAK
10:30	F.G. HOWARTH. Bishop Museum, Hawaii. High-stress subterranean
	habitats and evolutionary change in cave inhabiting arthropods.
11:00	F.S. CHAPIN, III. University of California at Berkeley. How suites of
	traits have evolved in plants in response to environmental stress.
11:30	A.A. HOFFMAN. La Trobe University, Australia. Plastic vs. nonplastic
	responses to environmental stress in Drosophila.
	·
FRIDAY	MORNING I LOUNGE, Building 3
	Contributed papers 15: GENETIC POPULATION STRUCTURE;
	POPULATION GENETICS OF ENDANGERED SPECIES
	CHAIR: MICHAEL S. BLOUIN
8:00	PARK, LINDA K National Marine Fisheries Service. mtDNA variation
	in the D-loop and ND5/ND6 regions of chum salmon (0. keta) around
	the Pacific Rim.
8:15	BLOUIN, MICHAEL S Sonoma State University. Genetic structure of
	parasite populations: effects of host dispersal and parasite life history.
8:30	RILEY, MARGARETYale University. Molecular evolution of colicin
	plasmids in bacteria.
8:45	DUNCAN, KATHLEEN EUniversity of Arizona. Comparing patterns
	of genetic diversity in co-occurring related species of soil bacteria.
9:00	PODOLSKY, ROBERT HUniversity of California at Riverside.
0.00	Patterns of morphological variation: a tale of two populations.
9:15	TONKYN, DAVID WClemson University. Optimization techniques in
3.10	the genetic management of endangered species.
	are genetic management of endangered species.

9:30	HALLEY, JOHNImperial College, London. Using genetic and demographic information to investigate past population bottlenecks.
	An application to elephant seals.
9:45	PRAY, LESLIEUniversity of Vermont. Conservation genetics: an
10:00	experimental study of inbreeding depression. BREAK
10:00	BREAK
FRIDAY M	ORNING I LOUNGE, Building 4
	Contributed papers 16: LIFE HISTORY EVOLUTION, ANIMALS CHAIR: DONALD B. MILES
8:00	BEACHY, CHRISTOPHER K University of Southwestern Louisiana.
	Life history evolution in biphasic salamanders: constraints and
0.45	hypotheses for the family Plethodontidae.
8:15	LEIPS, JEFF; JOSEPH TRAVISFlorida State University. Comparative
	developmental responses to temperature and resource-level
8:30	fluctuations in larvae of two closely related species of treefrogs. MOREY, STEVEN RUniversity of California at Riverside. Plasticity in
0.00	amphibian metamorphosis: importance of critical thresholds.
8:45	PARICHY, DAVID M.; ROBERT H. KAPLANReed College.
	Developmental plasticity and maternal effects on hatchling sprint
	speed in the frog Bombina orientalis.
9:00	TRAVIS, JOSEPHFlorida State University; JOEL TREXLERFlorida
	International University; CARLIANE JOHNSONFlorida State
	University. Variation in norms of reaction for life-history traits among
0.45	clones of the unisexual fish Poecilia formosa.
9:15	REZNICK, DAVIDUniversity of California at Riverside. Life history
9:30	evolution in guppies: convergence in life history patterns.
9.30	ADOLPH, STEPHEN C.; WARREN P. PORTERUniversity of
	Wisconsin. Temperature, activity, and lizard life histories: a physiological model.
9:45	MILES, DONALD BOhio University. Temporal patterns of natural
00	selection affecting locomotion and body size in a population of
	Urosaurus ornatus.
10:00	BREAK
FRIDAY M	2001102, Dallaling 7
	Contributed papers 17: SYSTEMATIC METHODS
0.00	CHAIR: CHRISTOPHER A. MEACHAM
8:00	MEACHAM, CHRISTOPHER AUniversity of California at Berkeley.
	Evaluation of individual morphological or molecular characters for
0.15	phylogenetic analysis by probability of character compatibility.
8:15	ALLARD, MARC W.; MIKE M. MIYAMOTOUniversity of Florida.
	Testing phylogenetic approaches with empirical data as illustrated with the parsimony method.
	with the parallibility method.

8:30 KNIGHT, ALEC; DAVID P. MINDELL--University of Cincinnati. Substitution bias, a priori weighting of DNA sequence change, and the phylogenetic position of Fea's viper. GRAYBEAL, ANNA--Smithsonian Institution. Identifying 8:45 phylogenetically informative genes for a large and old clade of amphibians. 9:00 GARLAND, TED--National Science Foundation and University of Wisconsin. Phylogenetic analysis of covariance by computer simulation. 9:15 SIMON, CHRIS--University of Connecticut. Rate of evolution of rRNA genes, sites free to vary, and the importance of closely related species. 9:30 GATESY, JOHN--American Museum of Natural History; ELISABETH VRBA--Yale University; ROB DESALLE--American Museum of Natural History. Calibration of mtDNA evolution in antelopes using the pliopleistocene African fossil record. FARRELL, BRIAN--Cornell University. Rates of mitochondrial DNA 9:45 evolution and the diversification of milkweed herbivores. 10:00 BREAK FRIDAY MORNING I LOUNGE, Building 8 Contributed papers 18: PLANTS: REPRODUCTIVE BIOLOGY, GENDER ALLOCATION CHAIR: PAUL R. NEAL 8:00 MAZER, SUSAN; LORNE WOLFE--University of California at Santa Barbara. Effects of intra-specific competition on the heritability of fitness components and sex allocation in wild radish, Raphanus sativus. 8:15 NEAL, PAUL R.--Yale University. Gender modification in an andromonoecious plant: the importance of measuring gender in successive inflorescences. 8:30 OLIVIERI, ISABELLE--INRA Montpellier, France; DENIS COUVET--CNRS Montpellier, France; MONTY SLATKIN--University of California at Berkeley. Allocation of reproductive effort in perennial plants under pollen limitation. 8:45 SHYKOFF, JACQUI--Nederlands Instituut voor Oecologisch Onderzoek, The Netherlands. Selection on pollen dispersal and siring ability: what determines allocation to pollen? 9:00 SPIRA, TIMOTHY P .-- Georgia Southern University; ALLISON A. **SNOW**--Ohio State University. *Interplant differences in pollen tube* growth and the potential for "super males" in Hibiscus moscheutos. 9:15 PURRINGTON, COLIN B.--Brown University. Germination, sexual dimorphism and sex ratio in the dioecious perennial Silene latifolia.

9:30	DONOHUE, KATHLEENUniversity of Chicago. Maternal effects and
9:45	the evolution of seed dispersal in the Great Lakes Sea Rocket. LEBUHN, GRETCHENUniversity of Connecticut. Pollen packaging
10:00	with unreliable pollinators. BREAK
FRIDAY MO	DRNING II LOUNGE, Building 3
Contribu	uted papers 19: POPULATION GENETICS OF ENDANGERED SPECIES;
	ECOLOGICAL GENETICS
	CHAIR: JOHN M. BATES
10:30	VOGLER, ALFRIED P.; ROB DESALLEAmerican Museum of Natural
	History. Mitochondrial DNA phylogeny and population genetics of an
40.45	endangered tiger beetle.
10:45	BRUFORD, MICHAEL WInstitute of Zoology, London. DNA
11:00	fingerprinting and conservation genetics of the Mauritius pink pigeon.
11.00	BATES, JOHN MLouisiana State University. Genetic effects of forest fragmentation on an Amazonian antbird, Hylophylax poecilinota.
11:15	MALDONADO, JESUS EUniversity of California at Los Angeles.
	Geographic variation of ornate shrews (Sores ornatus) based on
	allozyme electrophoresis.
11:30	AMATO, GEORGENew York Zoological Society. A phylogeny of
	extant species and subspecies of rhinoceros based on mitochondrial
	DNA sequence data.
11:45	STANLEY, HELEN FInstitute of Zoology, London. Molecular
	evolution and genetic diversity of the Camelidae.
12:00	ENDLER, JOHN A.; ANNE HOUDEUniversity of California at Santa
	Barbara. Geographic variation in mating preferences and dislikes in
	natural guppy populations.
5010 A 1/ 14/	
FRIDAY MO	
. (CHAIR BAYMOND RIFFOTTI
10:30	CHAIR: RAYMOND PIEROTTI VON DOHLEN, CAROL DUniversity of Arizona. Secondary loss of
10.50	host alternation and the evolution of asexuality in aphids.
10:45	BARROWCLOUGH, GEORGE F.; ROBERT F. ROCKWELLAmerican
	Museum of Natural History. Variance of lifetime reproductive
	success: problems and estimation.
11:00	PIEROTTI, RAYMONDUniversity of Arkansas. Age of independence,
	surviving the first reproductive attempt, and assessment: are these
	the key life history variables?
11:15	BOGGS, CAROL; CHARLES ROSSStanford University. The effect of
	adult food limitation on life history traits in Speyeria mormonia
	(Lepidoptera: Nymphalidae).

11:30 LEROI, ARMAND M .-- University of California at Irvine. Evolution of a life-history trade-off in Drosophila melanogaster. 11:45 CHIPPINDALE, ADAM--University of California at Irvine. Evolutionary relationships between developmental and adult life-history in Drosophila. FRIDAY MORNING II LOUNGE, Building 7 Contributed papers 21: MOLECULAR PHYLOGENETICS CHAIR: CAROL J. BULT 10:30 HILU, KHIDIR W .-- Virginia Polytechnic Institute and State University. 5\$ ribosomal gene in higher plants: evolutionary and systematic considerations. 10:45 BULT, CAROL J .-- Smithsonian Institution. Tribal relationships within Onagraceae: inferences from rDNA sequence data. 11:00 BRUNS, TOM--University of California at Berkeley. Evolutionary relationships within the rust fungi: evidence from the 18S rRNA gene. 11:15 VOGLER, DETLEV R.--University of California at Berkeley. Phylogenetic relationships among the North American pine stem and branch rust fungi. 11:30 GARGAS, ANDREA--University of California at Berkeley. Molecular systematics of lichenized and non-lichenized fungi (Ascomycotina) based on their 18SrDNA sequences. FRIDAY MORNING II LOUNGE, Building 8 Contributed papers 22: PLANTS: REPRODUCTIVE BIOLOGY CHAIR: ANDREW G. STEPHENSON 10:30 STEPHENSON, ANDREW G.--Pennsylvania State University. Effects of soil phosphorus levels on pollen grain size and pollen performance. 10:45 ROCHE, BERNADETTE--University of North Carolina at Chapel Hill. The effect of varying nectar production on reproductive success in Silene alba. 11:00 HODGES, SCOTT A .-- Rutgers University. Stabilizing selection for nectar production in Mirabilis multiflora. 11:15 TRIPLETT, JIM; ELLEN L. SIMMS--University of Chicago. Quantitative genetics of nectar production in the field in Ipomoea purpurea. 11:30 DORN, LISA--University of Montana. Quantitative and molecular genetics of flowering time in Arabidopsis thaliana. 11:45 LU, YING--Indiana University. Influence of the timing of annual leaf senescence on the expression of demography in a perennial clonal herb, the may apple Podophyllum peltatum.

FRIDAY AFTERNOON THEATER		
	SYMPOSIUM: EVOLUTION OF DEVELOPMENTAL POLYMORPHISMS	
	ORGANIZERS: J. KINGSOLVER AND N. MORAN	
1:30	J. KINGSOLVER. Introduction to the symposium.	
1:35	N. MORAN. University of Arizona. Models of developmental	
	polymorphisms and complex life cycles in aphids.	
2:00	D. WHEELER. University of Arizona. The developmental basis and	
	evolution of developmental polymorphisms in the social Hymenoptera.	
2:25	D. ROFF. McGill University. Wing dimorphism in insects.	
2:50	BREAK	
3:30	J. KINGSOLVER. University of Washington. Seasonal polymorphisms	
0.00	in butterfly color patterns.	
3:55	D. HARVELL. Cornell University. Inducible defensive polymorphisms in	
0.00	colonial marine invertebrates.	
4:20	R.D. SEMLITSCH. University of Zurich. Metamorphosis and	
7.20	paedomorphosis in amphibians: alternative life history pathways in	
	varying aquatic environments.	
4:45	A. MEYER. State University of New York at Stony Brook. <i>Diet</i> ,	
4.45	heterochrony, and trophic polymorphism in cichlids.	
	neterochrony, and troping polymorphism in cichnos.	
FRIDAY A	AFTERNOON I LOUNGE, Building 3	
	ntributed papers 23: QUANTITATIVE AND ECOLOGICAL GENETICS	
	CHAIR: ADRIANA DARIELLE BRISCOE	
1:30	SVED, JOHN University of Sydney, Australia. Selecting for high	
	fitness chromosomes in Drosophila.	
1:45	SPOFFORD, JANICE BUniversity of Chicago. X-linkage constraints	
	on multiple-allele equilibria and dynamics.	
2:00	GAVRILETS, SERGEYINRA Centre de Toulouse, France. Pleiotropy,	
	epistasis and stabilizing selection.	
2:15	BRISCOE, ADRIANA DARIELLEStanford University. Evolutionary and	
2.10	physiological theories of dominance: the R.A. Fisher-Sewell Wright	
	debate.	
2:30	LYNCH, MICHAELUniversity of Oregon. The mutational meltdown.	
2:45	HOULE, DAVIDUniversity of Oregon. The genomic mutation rate for	
2.40	fitness in Drosophila melanogaster.	
3:00	BREAK	
3:00	DREAK	
FRIDAY A	AFTERNOON I LOUNGE, Building 4	
	Contributed papers 24: LIFE HISTORY EVOLUTION, ANIMALS	
CHAIR: DON R. LEVITAN		
1:30	CANCELED	
1:45	MARQUET, PABLO A.; JAMES H. BROWN; MARK L. TAPER	
1140	University of New Mexico. Evolution of body size: consequences of	
	an energetic definition of fitness.	
	an energetic definition of fittless.	

2:00 CALDWELL, ROY L.--University of California at Berkeley. Costs associated with reproduction in male gonodactylid stomatopod crustaceans. LEVITAN, DON R.--University of California at Davis. Sperm limitation 2:15 and the evolution of egg size in free-spawning organisms. EDMANDS, SUZANNE--University of California at Santa Cruz. Life 2:30 history tactics and phylogenetic relationships in the sea anemone genus Epiactis. HAVENHAND, J.N.--Flinders University, Australia. Influence of pre-2:45 metamorphic period on the evolution of larval type in marine invertebrates. 3:00 BREAK FRIDAY AFTERNOON I LOUNGE, Building 7 Contributed papers 25: MOLECULAR PHYLOGENETICS CHAIR: MARK L. MCKNIGHT CHIPPINDALE, PAUL T.; DAVID M. HILLIS--University of Texas at 1:30 Austin. Evolution and phylogeny of hemidactyliine plethodontid salamanders, and relationships of the Texas neotenic salamanders (Eurycea and Typhlomolge). MCKNIGHT, MARK L .-- University of California at Davis. An intron-like 1:45 mtDNA segment in Ambystoma: systematic implications. HELM-BYCHOWSKI, KATHLEEN; JOEL CRACRAFT--University of 2:00 Illinois. Relationships of birds-of-paradise and bower birds: evidence from mitochondrial gene sequences. GELTER, HANS P.; LISLE GIBBS; PETER T. BOAG--Queen's University. 2:15 Mitochondrial D-loop evolution in Darwin's Finches. HACKETT, SHANNON J.--Louisiana State University. Molecular 2:30 biogeography of Central American birds. GATESY, JOHN--American Museum of Natural History; GEORGE 2:45 AMATO; MARK NORELL--Yale University; ROB DESALLE--American Museum of Natural History. Higher level relationships of crocodilians based on DNA sequence data. FRIDAY AFTERNOON I LOUNGE, Building 8 Contributed papers 26: MOLECULAR EVOLUTION CHAIR: R.H. CROZIER 1:30 AKASHI, HIROSHI--University of Chicago. Codon bias in Drosophila: natural selection and translational accuracy. 1:45 CAREW, ELIZABETH A .-- Yale University. Evolution of the Adh locus in the Drosophila willistoni group: the loss of an intron and shift in

codon usage.

2:00	CROZIER, R.HLa Trobe University. The mitochondrial genome of the honeybee: apparent effects of extreme base composition on protein make-up.
2:15	HUANG, JINGFELKunming Institute of Zoology, China. The relations of nucleic acid sequence fractals with structures and evolution.
2:30	GLEASON, JENNIFERYale University. Rates of DNA evolution in Drosophila depend on function and development stage of expression.
2:45	GUTTMAN, DAVID SState University of New York at Stony Brook. Detection of intergenic recombination in Escherichia coli.
3:00	BREAK
FRIDAY AF	TERNOON II LOUNGE, Building 3
	ributed papers 27: QUANTITATIVE AND ECOLOGICAL GENETICS CHAIR: WILLIAM R. RICE
3:30	EISSES, KAREL THUniversity of Utrecht, The Netherlands. Directed mutations in Drosophila? A case study with 2-methoxyethanol.
3:45	RICE, WILLIAM RUniversity of California at Santa Cruz. Sexually antagonistic genes and sex chromosome evolution: an experimental study.
4:00	BARAHONA, ANANational University of Mexico (UNAM). Genetics and evolution: evolutionary significance of mobile genetic elements.

SATURDAY EVENING

THEATER

SSB PRESIDENTIAL ADDRESS 7;30-8:30 p.m. DR. WILLIAM FINK, University of Michigan "The Changing Role of Systematics in Biology."

SATURDAY 8:30-11:00 PM

Building 14, ROOMS 203-204

The poster sessions will be accompanied by complimentary liquid refreshment derived from grain.

POSTER SESSION II

- 50. MATSUDA, HIROYUKI--University of Minnesota; MICHIO HORI--Wakayama Medical College, Japan; PETER A. ABRAMS--University of Minnesota. Effects of predator-specific defence on predator persistence and community complexity.
- 51. PASCUAL, MARTA; LUIS SERRA--Universitat de Barcelona, Spain. Ecological relationships between the colonizing species Drosophila subobscura and other Drosophila species of California.
- 52. MAHER, CHRISTINE R.--University of California at Davis. Are female pronghorn more mobile during the breeding season?
- 53. GOFF, PETER--University of Vermont. Kin cannibalism: the evolution of an antisocial behavior in Plagiodera versicolora.
- 54. SMOUSE, PETER E.; THOMAS R., MEAGHER--Rutgers University. Likelihood parentage analysis in Chamaelirium luteum: differential reproductive success.
- 55. **HELENURM, KAIUS-**-San Diego State University. *Genetic load, maternal effect and mating system in Lupinus texensis.*
- 56. ECKHART, VINCENT M.; JON SEGER--University of Utah. Evolution of sexual systems and sex allocation in annual plants when growth and reproduction overlap.
- 57. ST. MARY, COLETTE M.--University of California at Santa Barbara. A dynamic optimization approach to sex allocation in two congeneric species of gobiid fishes.
- 58. **HUDSON, RICK E.**--University of Arizona. The life history of sex and dormancy in the sporulating bacteria Bacillus subtilis.
- 59. **KOHN, ALAN J.-**-University of Washington. *Developmental patterns, dispersal and geographic distribution: the marine gastropod Conus.*

SUNDAY MORNING THEATER				
SSE SYMPOSIUM: MOLECULAR EVOLUTION OF DEVELOPMENT				
	AND GENE EXPRESSION			
	ORGANIZER: D. CAVENER			
8:30	N. PATEL. Carnegie Institute of Washington. Evolution of			
	segmentation genes in Drosophila.			
9:15	M. SCOTT. Stanford University. Regulation of development by			
	homeotic genes.			
10:00	BREAK			
10:30	J. WHITING. MRC Cambridge. Evolutionary aspects of murine hox			
	gene regulation.			
11:15	D. CAVENER. Vanderbilt University. Evolution of tissue-specific			
	regulation of gene expression.			

SUNDAY MORNING I

LOUNGE, Building 3

Contributed papers 47: QUANTITATIVE AND ECOLOGICAL GENETICS; GROWTH, DEVELOPMENT AND EVOLUTION

CHAIR: ROBERT BROWNE

- 8:00 **BROWNE, ROBERT**--Wake Forest University. *Is parthenogenesis "ancient" in Artemia (brine shrimp)?*
- 8:15 **SPITZE, KEN**--University of Miami. *Life-history covariance and population differentiation in Daphnia.*
- 8:30 **FOOTE, DAVID--**Hawaii National Park. *Rates of morphological evolution in the Mediterranean fruit fly in Hawaii.*
- 8:45 CLANCY, DAVID JOHN--La Trobe University. Cytoplasmic incompatibility in insects: current situation and prospects for pest control.
- 9:00 CHAZDON, ROBIN L.; ADRIENNE B. NICOTRA--University of Connecticut. Genetic variation influences growth but not photosynthetic capacity in rain forest shrubs grown under two light levels.

9:15	SMITH, JULIA IUniversity of California at Berkeley. Environmental influence on growth and development in the song sparrow (Melospiza melodia).
9:30	BURNS, KEVIN JUniversity of California at Berkeley. Geographic variation in the ontogeny of the fox sparrow (Passerella iliaca).
9:45	LEVINTON, JEFFREY S State University of New York at Stony Brook. <i>Fiddler crab claws: interspecific variation, morphometric</i>
1.0:00	scaling, and biomechanical function of a sexually selected trait. BREAK
SUNDAY I	MORNING I LOUNGE, Building 4
	Contributed papers 48: EVOLUTION OF SEX
	CHAIR: STEPHEN C. WEEKS
8:00	WEEKS, STEPHEN CUniversity of Georgia. The genetic mechanism of sex determination in an androdioecious shrimp, Eulimnadia texana.
8:15	ORZACK, STEVENUniversity of Chicago. Quantitative genetics of sex ratio traits in a parasitic wasp.
8:30	HUDSON, RICK E University of Arizona. The life history of sex and
0.45	dormancy in the sporulation bacteria Bacillus subtilis.
8:45	PERROT, VERONIQUEUniversity of Basel; SOPHIE RICHERD;
	MYRIAM VALEROUniversity of Lille; ALEX KONDRASHOV
	University of Wisconsin at Madison. Evolution of haploidy and diploidy: individual selection models.
9:00	NORMARK, BENJAMINCornell University. A molecular-phylogenetic
0.00	study of parthenogenesis in South American weevils (tribe Naupactini).
9:15	LIVELY, CURT;Indiana University. Parthenogenesis in a fresh water
00	snail: reproductive assurance versus parasitic release.
9:30	CHANDLER, MARK; GRAHAM BELLMcGill University. A
	comparative test of the red queen theory of recombination and
	parasites.
9:45	CANCELLED
10:00	BREAK
	MORNING I LOUNGE, Building 7
Cor	ntributed papers 49: PHYLOGENY AND CHARACTER EVOLUTION; PALEOBIOLOGY AND MACROEVOLUTION
	CHAIR: AN-MING TAN
8:00	BORNBUSCH, ALAN H.; MELINDA LEESmith College. Structural
7/2/2	evolution of anchovy (Teleostei: Engrauloidea) gill rakers and its
0.45	relationship to feeding behaviors.
8:15	REED, KENT MUniversity of Rochester. Evolutionary cytogenetics of the paternal-sex-ratio chromosome of Nasonia vitripennis.
	2 personal con ratio and amount of Masonia vitipennis.

8:30	WASSERMAN, MARVINQueens College; ALFREDO RUIZ Universidad Autonoma, Barcelona. Multiple pathways in the				
8:45	cytological evolution of Drosophila. TAN, AN-MINGUniversity of California at Berkeley. Evolutionary cytogenetics of the salamander genus Taricha, Salamandridae.				
9:00	BRITTON-DAVIDIAN, JANICEUniversite Montepellier II, France. Chromosomal phylogeny in the African rodent genus Mastomys.				
9:15	BHARATHAN, GEETA; DAVID GALBRAITHSmithsonian Institution. Variation and evolution of genome size in the monocotyledons and other palaeoherbs.				
9:30	MASTERSON, JANEUniversity of Chicago. The geological history of polyploidy in woody angiosperms.				
9:45	ARCHIBALD, J. DAVIDSan Diego State University. Assessing modes of speciation from the fossil record using cladistics and biostratigraphy.				
10:00	BREAK				
SUNDAY MORNING I Contributed papers 50: PLANTS: POPULATION STRUCTURE; DEMOGRAPHY; PHENOTYPIC PLASTICITY					
8:00	CHAIR: BROOK G. MILLIGAN HEYWOOD, JOHN SSouthwest Missouri State University. Isolation				
8:15	by distance in plant populations of the Tallgrass prairie. MILLIGAN, BROOK GUniversity of Texas at Austin. Quantification of genetic differentiation using RAPD markers: an example from West Texas populations of Aquilegia (Ranunculaceae).				
8:30	WILLIAMS, RICKRocky Mountain Biological Laboratory. Variation in genetic structure and the mating system among populations of Cryptotaenia canadensis (Umbelliferae).				
8:45	TONSOR, STEPHEN JKellogg Biological Station. Does mating system affect phenotypic variance and heritability in Plantago lanceolata?				
9:00	NAUTA, MAARTEN JAgricultural University, Wageningen. A population genetic model on the evolution of vegetative incompatibility in filamentous ascomycetes.				
9:15	LANDA, KEITHIndiana University. Demographic and physiological responses to root pruning in a clonal perennial herb.				
9:30	BAKER, HERBERT GUniversity of California at Berkeley. Feral cabbagesdedomestication of Brassica oleracea.				
9:45	GALLOWAY, LAURA FUniversity of California at Davis. Is plasticity adaptive? Responses to local environmental heterogeneity in the common monkey flower.				
10:00	BREAK				

	SUNDAY MORNING II Contributed papers 51: GROWTH, DEVELOPMENT AND EVOLUTION		
	CHAIR: SHARYN B. MARKS		
10:30	ZELDITCH, MIRIAM LUniversity of Michigan. Ontogeny of skull shape variation in cotton rats: a geometric approach.		
10:45	ATCHLEY, WILLIAM RNorth Carolina State University. Transgenic epigenetic effects on skeletal development in the mouse.		
11:00	MARKS, SHARYN BUniversity of California at Berkeley; NEIL SHUBINUniversity of Pennsylvania; DAVID B. WAKEUniversity of		
•	California at Berkeley. Limb development in the Plethodontid salamander genus Desmognathus: testing hypotheses of function, ancestry and developmental constraint.		
11:15	QUEATHEM, ELIZABETH; VINCE ECKHARTUniversity of Utah. The mechanics of grasshopper jumping performance and the evolution of life history traits.		
11:30	ZERA, ANTHONY JUniversity of Nebraska at Lincoln. Different endocrine mechanisms regulate morph induction and morph-specific		
11:45	reproduction in the wing-dimorphic cricket, Gryllus rubens. GILCHRIST, GEORGE WUniversity of Washington. Effect of		
	parental and developmental environments on locomotory performance curves.		
SUNDA	Y MORNING II LOUNGE, Building 7		
	Contributed papers 52: PALEOBIOLOGY AND MACROEVOLUTION CHAIR: BRIAN A. MAURER		
10:30	BRIGGS, JOHN C University of Georgia. Why so few species in the sea?		
10:45	GILLESPIE, ROSEMARYUniversity of Maryland. In what direction does a taxon cycle? Range restrictions as an indicator of either derived or ancestral affinity.		
11:00	LIEBERMAN, BRUCE SAmerican Museum of Natural History; WARREN D. ALLMONUniversity of South Florida; NILES ELDREDGE American Museum of Natural History. Cell-lineage drive, a developmental mechanism controlling macroevolutionary patterns in the turritellid gastropods.		
11:15	MAURER, BRIAN A.; DANIELLE D. MONTAGUEBrigham Young University. A darwinian model for the evolution of taxonomic diversity, I: theoretical development.		
11:30	MONTAGUE, DANIELLE D.; BRIAN A. MAURER;Brigham Young University. A darwinian model for the evolution of taxonomic diversity, II: empirical tests.		
11:45	ROTHSCHILD, LYNN J.; ROCCO MANCINELLINASA/AMES Research Center. Photosynthesis and nitrogen fixation in ancient stromatolites as deduced from modern microbial mats.		

SUNDAY MORNING II LOUNGE, Building		
	Contributed papers 53: PLANTS: PHENOTYPIC PLASTICITY CHAIR: CARL D. SCHLICHTING	
10:30	ACKERLY, DAVID D.; FAKHRI A. BAZZAZHarvard University.	
	Testing the adaptive value of phenotypic plasticity: plant growth	
	analysis following a sudden switch in light environment.	
10:45	SCHMITT, JOHANNABrown University. Reaction norms of	
	morphological and life history traits to light availability in Impatiens capensis.	
11:00	SCHLICHTING, CARL D.; MASSIMO PIGLIUCCIUniversity of	
	Connecticut. Phenotypic plasticity and environment-dependent resemblance among Phlox populations.	
11:15	MILLER, RICHARD E New Mexico State University. Variation in	
	reaction norms among populations of Bouteloua rigidiseta (Texas grama).	
11:30	EVANS, ANN SUniversity of New Mexico. Morphological	
	asymmetry as an indicator of stress in two populations of the mustard Brassica campestris.	
11:45	GARBUTT, KEITHWest Virginia University. Temporal environmental	
	heterogeneity and fitness in Abutilon theophrasti.	
12:00	MEAGHER, THOMAS RRutgers University. Genetic interactions between male and female reproductive performance in Silene latifolia.	

Reminder to Contributed Paper Session Chairs. Please arrive early to your session and introduce yourself to the projectionist. Go over your equipment with the projectionist. Your room should have a slide projector; an overhead projector; a podium light; and a pointer. If you do not have a watch for timing the speakers the projectionist will loan you one.

Please announce at the beginning of your session that all speakers should already have loaded their slides or should do so as soon as possible. The projectionist will have some carousels available.

You then need to ANNOUNCE the rules, which are as follows: 1. Speakers have a total of 15 minutes, including questions. 2. The Chair will warn speakers at 12 minutes by a hand signal, and will further warn them by STANDING UP at 14 minutes. The speaker will be politely but firmly cut off at 15 minutes. No questions should be taken if the 15 minutes are gone.

You may enforce these rules by any device you think appropriate.

Do not get ahead of schedule if there is a cancellation; wait until the scheduled time to begin the next talk.

4:00 4:20	Noreen R. Tuross Tom W. Quinn	Ancient Molecules in Bone: How Far Back in Time? CLOSING REMARKS

The study of molecular evolution occupies a special position in contemporary biology. In trying to link gene to organism, it touches molecular biology, cell biology, developmental biology, physiology, anatomy and behavioral biology. It also requires an understanding of how genes behave in populations, and the disciplines of taxonomy, paleontology and geology are involved. No other field touches all these aspects of biology and geology. The study of molecular evolution provides an opportunity to build bridges between biological disciplines and by so doing contributes to the unification of the life sciences.

- Allan C. Wilson, 1985

The co-conveners, Barbara Bowman and Tom Quinn, wish to thank the Alfred P. Sloan Foundation, the Society for the Study of Evolution, and the speakers for making this symposium possible. We speak for Allan's students and associates in expressing our deep gratitude to Allan himself for his constant support and enlightening ideas which have touched all of us in our professional and private lives.

WELCOME TO CLARK KERR CAMPUS

On behalf of the staff at Clark Kerr Campus, welcome to the University of California at Berkeley's residence halls. We hope your stay is enjoyable. The front desk is located in Building 1, and is open from 7:00 am to 11:00 pm daily. If we can be of assistance, please drop by our office. For assistance after hours, call the office at 2-6290 from your room phone and your call will be forwarded to the clerk on duty.

ROOM & ROOMMATE

ASSIGNMENTS

Your room and roommate assignments were made in advance with your conference organizer. Please do not make room changes.

FURNITURE ARRANGEMENT

We have arranged each room to ensure your comfort. If you should change the arrangement, please return the room to its original configuration before you check-out.

S

Your assigned building and room number are imprinted on the paddle attached to your key. Use this key to access your building, your room and public areas in the building.

you lose your key, you must contact the front desk right away. Lost keys and keys not returned upon check-out are subject to a \$35.00 replacement fee.

Lock Outs

If you are locked out of your room during office hours, please go to the

front desk in Building 1. If the office is closed, call 2-6290 on a campus phone (642-6290 on a pay phone) and you will be connected with the clerk on duty. The clerk will either let you into your room or loan you a temporary key. Please be prepared to show the clerk photo identification.

LOST MEAL CARDS

You have been issued a meal card which you must present each time you enter the dining room. If you misplace your meal card, you may purchase a new card at the front desk. There is a \$5.00 replacement fee that must be paid in cash when the new card is issued.

TELEPHONE

Your room is equipped with telephone service for campus and local calls. Dialing instructions are located next to the phone. If you do not locate this card, the front desk can provide you with a copy.

relephone messages may be left for you at the front desk. All messages will be placed on the message board in the lobby of Building 1. The message telephone numbers is: (510) 642-6290.

NEWSPAPERS

Local newspapers may be purchased from coin operated stands located outside of the dining hall (Building 10) or at the bottom of the driveway on Warring Street.

X All

If you receive a letter during your stay, a notice will be posted on the message

board in the lobby of Building 1. Letters should be addressed as follows:

Your Name

Name of Your Conference Clark Kerr Campus 2601 Warring Street Berkeley, CA 94720 USA

STAMPS & CHANGE

Postage stamps and change for vending machines are available at the front desk.

MAINTENANCE

If you notice that a repair is needed in your room, please contact the front desk and our maintenance staff will correct the problem.

FIRE ALARM

The fire alarm is an intermittent, shrill bell. At the sound of the alarm, you MUST vacate the building. The Fire Department will check all rooms and issue fines to those who do not vacate the building.

PARKING

If you were issued a yellow conference parking permit, it must be displayed on your dashboard. You may park in the Southwest Lot or the Northwest Lot. Consult your conference organizer to determine the arrangements for your group.

RECREATIONAL SWIMMING

The Golden Bear Recreation Center swimming pool is located on the northeast side of the Clark Kerr Campus. The cost is \$3.50 per entrance. Call 2-9821 for more details.

Open swim hours are:

Monday - Friday 12:00 noon to 3:00 pm Saturday - Sunday 12:00 noon to 5:45 pm

CHECK-OUT

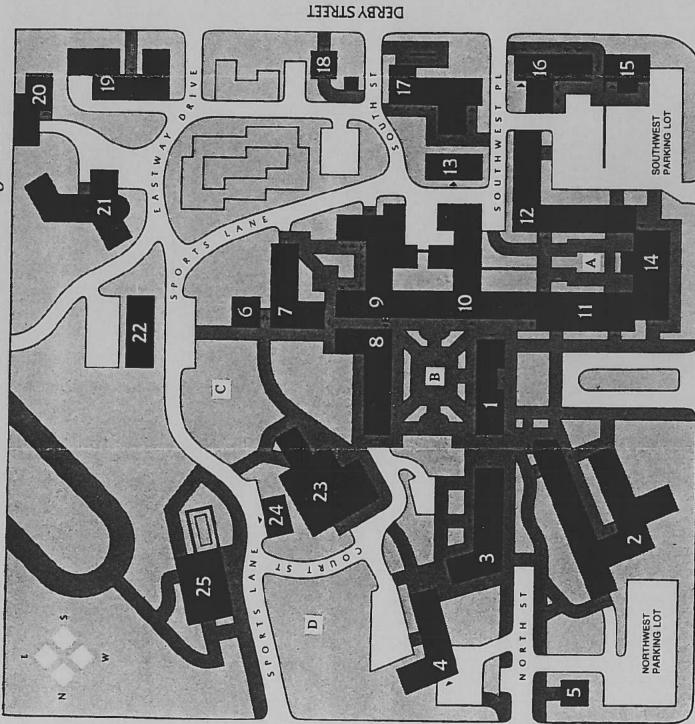

You must check out by 1:00 pm, unless other arrangements have been made by your conference coordinator. To check out, you must return your key to the front desk. If you do not return your key by check-out time, you will be charged a \$35.00 replacement fee.
